## Notice of Hydrant Flushing

Dear Resident and Business Owners:

On, Wednesday and Thursday, March 18 & 19, 2015, we will be in your area to conduct hydrant flow testing. This will require flushing a few hydrants at various locations in your area. Wednesday is the scheduled day, with Thursday as a back-up in case of bad weather, or if other issues arise.

The approximate hours we will be flushing hydrants will be between the hours of 8:30 a.m. and 3:30 p.m.

During this flushing period, you may observe discolored water and you may also experience lower than normal water pressure.

As a precaution, we suggest that you do the following:

- Refrain from washing clothes during this time.
- Check the water quality after flushing hours by running the cold water tap. If the water appears discolored, please run your cold water tap until it clears. You will notice the discoloration fading as you run the water. This should only take a few minutes. If the water does not clear within a few minutes, please contact our office at (516) 746-0751.
- Store water in containers to have available should you require water during flushing hours.
- You may wish to shut off your refrigerator's ice maker.

We regret any inconvenience this may cause.

If you have any questions or concerns, please contact the Village of Mineola, Water Department Office at (516) 746-0751.
